

Hazardous Waste Accumulation Area Procedures

1. Collect waste in a closed container
2. Segregate incompatibles, use secondary containment or flammable storage cabinet
3. Label waste using the EHS “Hazardous Waste” Label (cover or deface old labels)
4. List the contents and check the hazard (Flammable, Corrosive, Reactive or Toxic)
5. When container is full contact EHS for pick up

Never dispose of hazardous waste down the sink or in the trash. Contact EHS if you need help with disposal.

For training, to request waste appointments, or labels: SCAN the QR, visit the website or call! 828-1392
